BORTEC BIOMEDICAL ISSUES DECLARATION OF CONFORMITY FOR CE MARKING OF THE AMT-8

Calgary, AB, May 1, 2003 --- Bortec Biomedical Ltd. a medical device solutions provider based in Calgary, AB, has recently issued a Declaration of Conformity ensuring that the AMT-8 complies with the necessary requirements for CE marking. This allows for expanded marketing potential into the European Union for Bortec's AMT-8 electromyography signal acquisition system.

Dr. Scott Day, President and CEO at Bortec Biomedical commented that "We consider CE marking of our product an important milestone. It shows that Bortec can manage the regulatory requirements of the Medical Devices Directive ensuring all technical aspects of our products conform to these regulations. Additionally, Bortec believes that the CE marking of our product will allow us to access markets previously unexplored and ultimately increase our presence in the research community at large."

The AMT-8 is currently in use around the world in leading research laboratories utilizing electromyography as a key component of their research. With the ability to place the CE mark on the AMT-8, Bortec will be able to expand its market presence into the European Union ultimately increasing the sales and use of its products into this very important geographical market. Bortec currently has an exclusive distribution agreement with Tracksys Ltd., based in the United Kingdom for distribution into Ireland and the UK.
